

Case Study – Textile Architecture

Raymond Terrace Bowling Club

Project: Raymond Terrace Bowling Club
Location: Raymond Terrace, NSW Australia
Date completed: February 2007
Fabric: Ferrari® 1002 PVC Precontraint® (White)
Size: 4000m²
Design: Shade to Order
Manufacture: Shade to Order
Installation: Shade to Order

The first of its kind and one of the largest shade structures in the country, this massive canopy spans over an entire bowling green twice and covers an area of 4000sqm.

All weather playability, extended life span of synthetic greens and aesthetic appeal are just some of the benefits of such a structure.

Revolutionary design, cutting edge technology and industry leading workmanship all combine in this impressive structure.
