

BARREL VAULT STRUCTURES

BOTH FUNCTIONAL AND ATTRACTIVE

"Barrel Vault" structures are categorised by an arched profile usually formed by rolled structural steelwork.

The fabric is tensioned out over the steel and curves down between the rolled rafters. Barrel vaults are extremely versatile. They can attach to (or overlap) buildings, be fitted with heaters, lights and even drop down blinds to enclose the area.

Barrel Vaults can be made to any size. Shade to Order has made them from 40m² right up to the internationally award winning structures at Raymond Terrace Bowling Club covering 4000m² and Newcastle Airport covered walkway 1000m².

Shade to Order structures are an investment that will repay the customer with years and years of trouble free service. Fully warranted for up to 20 years with a design life of over 25 years, they are built to last.

Newcastle Airport Covered Walkway, Williamtown, NSW
