

# CAFES, ALFRESCO DINING

*STYLISH, PRACTICAL, COST EFFECTIVE*

Tension Membrane Structures are ideally suited for covering outdoor entertaining/alfresco areas. Heavy duty PVC (not shade cloth) fabrics have a design life in excess of 20 years and are extremely resilient to the worst mother nature can come up with.

We are a one stop shop. From design and drawings to fabrication and installation, every process is in house and we have tried and proven methods that result in award winning structures all over the world.

Contact us today to discuss the use of a Tension Membrane Structure for your café/alfresco project.
